Distribution of the grades

Distribution of the grades for DSLab Homework 1 (max: 60 points)

Common issues

- Part I: Overall well-done. csv files were sometimes missing

- Part II: Some issues with II.A (CO_2, altitude plot)
  - Only one point (median) for site is required

- Part III: Common issues:
  - III.a: The 'ZSBN' station was left out of the training phase
  - III.a: Divided the data into training (before 24.10) and testing (after 24.10)
  - III.b/c: The `faulty' station was left out of the training phase
  - III.b/c: Zone clusters were ignored
  - III.b/c: The linear model corresponding to one temporal cluster was used to correct the measurements of the entire month

- Clean your code before submitting:
